A reconciliation of the GAAP to non-GAAP gross margin, net income and earnings per share numbers for the periods presented, as well as a description of the items excluded from the non-GAAP calculations, is included in the financial statements portion of this press release.

Based on information available as of today, Ambarella is offering the following guidance for the second quarter of fiscal year 2018, ending July 31, 2017:

- Revenue is expected to be between \$69.0 million and \$72.0 million
- Gross margin on a non-GAAP basis is expected to be between 62.0% and 63.5%
- Operating expenses on a non-GAAP basis are expected to be between \$26.0 million and \$27.5 million

“Q1 revenue of \$64.1 million reflects our continued push to diversify our markets and customers with strong growth in the quarter coming from IP security cameras, including both professional and home monitoring markets, and continued growth in other cameras markets including wearable and automotive cameras,” said Fermi Wang, President and CEO of Ambarella. “While our current markets continue to expand, we believe the combination of video with computer vision technology will be the real driver of new opportunities in both our current markets as well as emerging markets such as OEM automotive and robotics. We feel our investment in the development of a family of computer vision SoCs in support of our customers’ advanced video cameras will be the foundation for the future expansion of our business.”

Stock Repurchase

Ambarella’s Board of Directors previously authorized the repurchase of up to an aggregate of \$75 million of the company’s ordinary shares through June 30, 2017. Repurchases may be made from time-to-time through open market purchases or through privately negotiated transactions subject to market conditions, applicable legal requirements and other relevant factors. The achievement or success of the matters covered by such forward-looking statements involves risks, uncertainties and assumptions. Our actual results could differ materially from those predicted or implied and reported results should not be considered as an indication of our future performance.

The risks and uncertainties referred to above include, but are not limited to, risks associated with revenue being generated from new customers or design wins, neither of which is assured; our ability to retain and expand customer relationships and to achieve design wins; the commercial success of our customers’ products; our growth strategy; our ability to anticipate future market demands and future needs of our customers; our ability to introduce new and enhanced solutions; the expansion of our current markets and our ability to successfully enter new markets; anticipated trends and challenges, including competition, in the markets in which we operate; our ability to effectively manage growth; our ability to retain key employees; and the potential for intellectual property disputes or other litigation.

Further information on these and other factors that could affect our financial results is included in the company’s Annual Report on Form 10-K for our 2017 fiscal year which is on file with the Securities and Exchange Commission. Non-GAAP Financial Measures

The company has provided in this release non-GAAP financial information including non-GAAP gross margin, net income, and earnings per share, as a supplement to the condensed consolidated financial statements, which are prepared in accordance with generally accepted accounting principles (“GAAP”). Management uses these non-GAAP financial measures internally in analyzing the company’s financial results to assess operational performance and liquidity. The company believes that both management and investors benefit from referring to these non-GAAP financial measures in assessing its performance and when planning, forecasting and analyzing future periods. Further, the company believes these non-GAAP financial measures are useful to investors because they allow for greater transparency with respect to key financial metrics that the company uses in making operating decisions and because the company believes that investors and analysts use them to help assess the health of its business and for comparison to other companies. Non-GAAP results are presented for supplemental informational purposes only for understanding the company’s operating results. The non-GAAP information should not be considered a substitute for financial information presented in accordance with GAAP, and may be different from non-GAAP measures used by other companies.

With respect to its financial results for the first quarter of fiscal year 2018, the company has provided below reconciliations between its non-GAAP financial measures to its most directly comparable GAAP financial measures. With respect to the company's expectations for the second quarter of fiscal year 2018, a reconciliation of non-GAAP gross margin and non-GAAP operating expenses guidance to the closest corresponding GAAP measure is not available without unreasonable efforts on a forward-looking basis due to the high variability and low visibility with respect to the charges excluded from these non-GAAP measures. We expect the variability of the above charges to have a significant, and potentially unpredictable, impact on our future GAAP financial results.
